OUTDOOR KNIVES

Knife is an integral part of outdoor life. It's an all-round tool that everyone should have on their belt, in the backpack or as part of the camping gear. Just like the traditional Nordic knives, the more modern Outdoor knives bear the heritage: functionality and uncompromising quality.

Outdoor series features knives for the outdoorsmen and hikers as well as traditional carving knives for craftsmen. The smallest knives are designed for children that are learning their knife skills, and they are very popular among younger scouts.
